                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ;;
O
                                                                                                                                                                                                                                                                                                                                                                                                                                                      cell line. Codon optimisation results in improved expression of the gaspol protein and reduces the risk of recombination between the transfer
                                                                                                                                                                                                                                                                                                                                       comprising the coding sequence for a heterologous envelope protein and a third retroviral purjectide sequence comprising a DNA sequence of interest and lentivirus, preferally HIV, cis-acting sequences required
                                                                                                                                                                                                                                                                                                                                                                   interest and lentivirus, preferably HIV. cis-acting sequences required for packaging, reverse transcription and integration. The packaging rell lines and viral particles can be used for gene therapy or gene replacement with improved safety. They can also be used in the development and production of varcines and hinchemical reagents. The present sequence is a gag coding region of codon optimised HIV gagpol sequence. This sequence is used in the packaging
                                                                                                                                                                                                                                                        The patent discloses new packaging cell line for producing a viral accessory protein independent lentivirus, preferably human immunodeficiency virus (HIV), denived retroviral vector particles. The packaging cell line comprises a mammalian cell, a retroviral DNA comprising a coding sequence for a lentivirus, preferably HIV, adapol, where the coding sequence for a lentivirus, preferably HIV, adapol, the viral gagpol proteins, a second retroviral nucleotide sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1 gacatecgecagggeeeeaaggaceetteegegactaegtggaeegettetteaagaee 60

The present sequence is the coding sequence of a HIV Gag expression cassette, Gag-ModSF2. The Gag protein of HIV is needed for the assembly of virus-like particles, in addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and carly post-entry steps in viral replication. HIV Gag-Pallyperides which may be used for the recombinant expression of HIV Gag-Pallyperides which may then be used to vaccinate against HIV infection and acquired immunodeliciency syndrome (AlDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Expression cassettes encoding the human immunodelicioncy virus (HIV) Gag-containing polypeptide useful for vaccinating against HIV infections and acquired immunodeficiency syndrome (AIDS) –

                                                                                                         9
                                                                                                                                                                                                                                  The present sequence is the coding sequence of a HTV Gag protease expression cassette, Gagreot.ModS. The Gag protein of HTV is needed for the assembly of vitas like particles, in addition, the day protein is have load in ment states of the HTV lite cycle, including assembly, vitron maturation after particle release and early post entry steps in viral replication. The expression research may then be used for the recombinant expression of HTV Gag Folypeptides which may then be used to vaccinate against HTV intection and acquired immunodeliciency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           HIV dag professe expression cassette coding sequence GagProtMod.SF2(GP1).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            recombinant expression of HIV dag-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndrome
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The present sequence is the ending sequence of a HTV Gar-protease expression easewite, Gaghrothwal.SP2 (GPI). The Gag protein of HTV is modeled for the assembly of virus-like particles. In addition, the Gag protein is involved in many states of the HTV like eggle, including assembly, viriou maturation after particle release and early post-entry stops in viral replication the expression easewite may be used for the

                                                                                                                                                                                                                                                                                                                                                                                                                                               13
                                                                                                                                                                                                                                                                                                                                                                                                                                                        AAA70472
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ò
                                                                                                                                                                                                                                                                                                                                               The present sequence is a HIV Gag/Hepatitis C virus (HCV) core fusion coding sequence. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post entry steps in viral replication. The present invention relates to synthetic HIV Gag expression cassettes. The present sequence was cloned and used to generate the expression cassettes of the present invention. The expression cassettes may be used for the recombinant expression of HIV Gag-Polypeptides which may then be used to veccinate against HIV infection and acquired immunodeficiency syndrome
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              862 gacatecyceagyyeeccaaggageeetteegeyaetaeytgyaeegettetaeaagaee 921

```
The present sequence is the coding sequence of a HIV Gaq-polymerase expression cassetts, Gaqpol Woose The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post entry steps in viral replication. The expression cassette may be used for the recombinant expression cassetted may then be used to vaccinate agains! HIV intertion and acquired immunodeficiency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                0; Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Expression cassettes encoding the human immunodeficiency virus (HIV)

The dat protein of HIV is needed for the assembly of VIII self-or particles. In addition, the Can protein is involved in many states of the HIV life eyele, including assembly virion maturation after particle release and early post-earty steps in viral replication. The
                                                                                                                                                                            The present involving relates to equitation HIV Gag and Environgers: observed in the day protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV like eyele, including assembly, virion maturation after particle release and early post entry steps in Viral replication. The expression cassettes may be used for the recombinant expression of HIV
                                                                                                                                                                                                                                                                                                                                                                                                                Gags and Envipolypeptides which may then be used to vaccinate against HIV
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             control of a single CMV promoter and between the two coding sequences an internal Ribosome Entry Site (RRS) is present.
                                                                                                                                                                                                                                                                                                                                                                                                                                                intection and acquired immunodeliciency syndrome (AlbS). The present sequence is a synthetic construct constructed in the generation of the

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ŝ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         5
